

of the deposited materials. Appended hereto is a copy of the ATCC report of viability for ATCC 97183, which is cross-referenced as HGS Docket PF189. The undersigned certifies that HGS Docket PF198 corresponds to docket number 325800-449 of the instant case.

**AMENDMENT**

In the Claims

Please delete, remove, or ignore the extraneous unattached text "a polypeptide ... SEQ ID NO:2" in the claims amendment portion of the prior amendment and amend the claims as follows:

Claims 23 and 24, please correct the spelling of "polypeptide."

26. (Amended) The isolated [polypeptide] polynucleotide of claim 23, wherein the [polypeptide] polynucleotide is DNA.

34. (Amended) A recombinant host cell comprising the polynucleotide of claim [22] 23, wherein said polynucleotide is DNA.

35. (Amended) A recombinant host cell comprising the polynucleotide of claim [25] 24, wherein said polynucleotide is DNA.

36. (Amended) A recombinant host cell comprising the polynucleotide of claim [26] 25, wherein said polynucleotide is DNA.

37. (Amended) A recombinant host cell comprising the polynucleotide of claim 29, wherein said polynucleotide is DNA.

38. (Amended) A method for producing a polypeptide comprising expressing from the recombinant cell of claim 34 the polypeptide encoded by said polynucleotide, wherein said polypeptide produced comprises a polypeptide sequence which is at least 95% identical to the amino acid sequence of SEQ ID NO:2.

E<sup>2</sup>  
Cont.  
39. (Amended) A method for producing a polypeptide comprising expressing from the recombinant cell of claim 35 the polypeptide encoded by said polynucleotide, wherein said polypeptide produced comprises a polypeptide sequence which is at least 95% identical to the amino acid sequence of SEQ ID NO:2.

Sub  
7.  
40. (Amended) A method for producing a polypeptide comprising expressing from the recombinant cell of claim 36 the polypeptide encoded by said polynucleotide, wherein said polypeptide produced comprises a polypeptide sequence which is at least 95% identical to the amino acid sequence of SEQ ID NO:2.

41. (Amended) A method for producing a polypeptide comprising expressing from the recombinant cell of claim 37 the polypeptide
